

Sadia Afrin

Board Bazar, Gazipur, Bangladesh | sadiaafrin21@iut-dhaka.edu | +8801992099240 | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

Professional Summary

Computer Science and Engineering student with experience in UI/UX Design, Software Quality Assurance, Mobile App Development, Full Stack Development, and Cross-Platform Application Development. Skilled in React Native, Flutter, MERN Stack, Spring Boot, Firebase, PostgreSQL, and Figma. Experienced in building scalable web and mobile applications, REST APIs, authentication systems, interactive UI/UX flows, and responsive interfaces, as well as manual QA testing of large-scale production applications. Strong understanding of software engineering, database management, object-oriented programming, and agile collaboration.

Education

Islamic University of Technology — Gazipur, Dhaka

Aug. 2022 – Sept. 2026

Bachelor of Science in Computer Science and Engineering, 8th Semester — CGPA: 3.35

Relevant Coursework:

Data Structures and Algorithms, Object Oriented Programming, Database Management, System Analysis and Design, Computer Architecture, Software Engineering and Object Oriented Design, Design Pattern

Technical Skills

Language	: C, C++, HTML, CSS, JavaScript, TypeScript, SQL, Dart, Java
Design Tools	: Figma, Scene-builder
Developer Tools	: Android Studio, VS Code, GitHub, Postman
Frameworks/Library	: Flutter, React Native, MERN stack, SpringBoot, JavaFX
Backend & Database	: Firebase, RESTful APIs, MongoDB, PostgreSQL
QA & Testing	: Manual Testing, Functional Testing, UI/UX Testing, Regression Testing, Bug Tracking, Cross-device/Cross-browser Testing

Professional Experience

UI/UX Designer Intern — [Techzu](#) (Remote, Singapore)

Apr. 2026 – Present

- Designed multi-platform POS interfaces for The Whale Tea including mobile, kiosk, admin panel, and website.
- Created reusable design systems, user flows, and interactive Figma prototypes improving design consistency.
- Conducted usability testing and collaborated with developers to ensure accurate UI implementation.

Software Quality Assurance (SQA) Intern — [Techzu](#) (Remote, Singapore)

Apr. 2026 – Present

- Performed manual QA testing on 3 large-scale, real-world production applications deployed and used by companies in Singapore.
- Tested **ZuPOS (The Whale Tea)**, a tea-selling application, covering product selection, ordering, pickup, delivery, membership, profile, rewards, scratch card, spin wheel, reward shop, and referral features.
- Tested **LunchAD**, an advertisement agency platform, covering authentication, dashboard, product and service management, quotations, sales orders, customer management, role management (master admin, admin, sales agent, customer portal), quotation performance reports, sales order reports, customer reports, roles, users, tax and location settings, customer email invitations, campaigns, documents, and terms and conditions.
- Testing **Prowork** (in progress), a project management platform with multiple user roles (owner, project manager, team lead, developer, HR), covering role-based dashboards, access and project reports, project templates, projects, modules and sub-modules, tasks and sub-tasks, blocker tracking, working-hour logging, developer work review by team leads, and HR review workflows.
- Identified, documented, and tracked bugs and inconsistencies, verified fixes, and collaborated closely with developers to improve overall product quality and release readiness.

Technologies: Manual Testing, Functional Testing, UI/UX Testing, Regression Testing, Bug Tracking

Mobile App Development Intern — [New BCIT Systems](#) (Remote)

Oct. 2025 – Dec. 2025

- Developed React Native application features and translated Figma designs into production-ready mobile screens.
- Implemented responsive UI components and collaborated with cross-functional teams on e-commerce solutions.

Projects

ZuPOS – The Whale Tea

Prototype

- Designed a comprehensive POS system for The Whale Tea bubble tea brand, covering mobile app, self-service kiosk, website, and admin panel — a full team project.
- Created end-to-end user flows and interactive prototypes for cashier and customer-facing interfaces across multiple form factors.
- Performed manual QA testing across product selection, ordering, pickup/delivery, membership, profile, rewards, scratch card, spin wheel, reward shop, and referral features.

Technologies: Figma, Manual Testing

LunchAD – Advertisement Agency Platform

QA Testing

- Manually tested a full-featured advertisement agency platform including authentication, dashboard, product and service management, quotations, and sales orders.
- Verified role-based access control across master admin, admin, sales agent, and customer portal roles, along with customer management, tax and location settings, and email invitations.
- Tested reporting modules including quotation performance, sales order, and customer reports, as well as campaigns, documents, and terms and conditions workflows.

Technologies: Manual Testing, Functional Testing, Role-Based Access Testing

Prowork – Project Tracking Platform

QA Testing, In Progress

- Testing a project tracking platform supporting multiple roles — owner, project manager, team lead, developer, and HR — each with role-specific dashboards.
- Verifying project templates, project/module/sub-module and task/sub-task tracking, blocker tracking, and working-hour logging and review workflows between developers, team leads, and HR.
- Validating access controls and reporting across project and event-level activities.

Technologies: Manual Testing, Functional Testing

Shondhan – AR Property Discovery Platform

GitHub

- Built an AI-powered and AR-integrated property discovery application using Flutter and Firebase.
- Implemented predictive analytics, map navigation, and immersive 3D property visualization

Technologies: Flutter, Dart, Firebase

JobSpring – Job Portal Platform

GitHub

- Developed a Spring Boot backend with authentication, role-based access control, notifications, and interview scheduling.
- Integrated REST APIs, PostgreSQL database, chatbot support, and recruiter/job seeker workflows.

Technologies: React-Vite, Tailwind CSS, Mantine, Spring Boot, Java, REST API, Postgres, Maven, Postman

Growth Assist– Autism Support App

GitHub

- Developed a mobile application for autism support featuring learning modules, secure authentication, events, and chat systems.
- Built personalized dashboards and educational tools using React Native and Firebase.

Technologies: React Native, Tailwind CSS, Firebase

Shoporia – E-commerce Mobile App

GitHub

- Built a cross-platform e-commerce application with authentication, cart management, product filtering, and checkout functionality.

Technologies: React Native, Node.js, MongoDB

Extracurricular Activities

- 6th position - Rajuk Intra College Math Olympiad (2019)
- 27th position - IUT Intra University Competitive Programming (2023).
